Subject: OMB guidelines

Dear Office of Management and Budget,

My name is Uri Neren and I have a background in Ecology. I am currently a Development Professional.

Please do not to move forward with guidance on cost-benefit analysis (known as the OMB Draft Guidelines for the Conduct of Regulatory Analysis and the Format of Accounting Statements). I truly believe that, one life should not be valued more than another, and that if we are going to do that: our senior citizens are worth far more than the rest of us youngsters. In addition I have great concern that this analysis will water down anti-pollution regulations and harm the health of senior citizens, and our vulnerable children.

Thank you for your time
Uri Neren
