Dear Gentle Person: Your putting a lesser value on my life as an older American in comparison to younger ones is not just insulting to me. It is a way of ducking your responsibility not to let polluters off the hook. It is suicide to let pollution continue. Actually, it means that younger Americans stuck with this legacy have, as far as you are concerned, zero% value attributed to their lives (maybe because you and your assistants will not be around to reap the detriment of this ill-conceived (excuse the pun) policy. Office of Management and Budget, NEOB
Room 10202, 725 17th Street, NW
Washington, DC 20503

Dear Office of Information and Regulatory Affairs Hunt:

•The "OMB Draft Guidelines for the Conduct of Regulatory Analysis and the Format of Accounting Statements" determines that saving the life of an elderly person is worth less than saving the life of a younger person.

•As an American citizen who is the child of two senior citizens in their 80's and who is getting up there herself (I'm 60), I find that devaluing an elderly person's life is unethical and unmoral.

•The analysis proposes to devalue the life of a human over 70 to 2/3 that of the rest of the population and lowers the established EPA price tag of a human life from \$6.1 million to \$3.7 million.

•This is a mere pretext to cut the value of health and safety standards in order to protect the industries that stand to gain from this White House initiative.

•If analysis is fully applied, regulations for air pollution, toxic waste cleanup, food labeling and other quality of life issues could be weakened or not even implemented at all—and our senior citizens will feel the brunt of it since their health is the most vulnerable to dirty air and unhealthy food.

Sincerely,

Patricia J. Barry
