Subject: Cost Benefit Analysis

I wish to let you know that I oppose the action now being proposed by the government around taking the value of people over 70 and using it to devalue the environment! How on earth can something like this go on in a country that values all of it's citizens. It is so obviously a "scheme" that it is no wonder it is sliding by with hardly any attention by the general public. If this nation were to devalue the contributions - monetarily, physically and spiritually - this country would be a great deal less of the nation it is today!

I urge someone there in Washington to stand up and put an end to this manipulation and maddness!

Sincerely,  
Judie Anders
