The Kidney Care Council (KCC) is a nonprofit Washington-based health care trade association of twelve renal care companies that collectively provide End Stage Renal Disease (ESRD) services to nearly 80 percent of the dialysis patients in the United States. The membership includes large, small, nonprofit and for-profit provider companies. The KCC's mission is to improve patient care through demonstrable improvements in patient outcomes, patient safety, and quality of life measures. The KCC is dedicated to improving quality as well as promoting education so that newly diagnosed patients fully understand this disease and how to slow its progression and reduce complications.
