What's New in the User Manual for 2007

As the 2007 PARTWeb FALL season begins, here is a list of a few changes:

- Improved tracking of Improvement Actions by adding two new fields: 1. date of expected completion; and 2. date updated.
- Added a status update option, "Inactive." This status should be used if the program has decided not to pursue the improvement action. For each improvement action that is made inactive, the program must replace it with an improvement action that is current.

Older changes that were made in the January 2007 update are:

- Status Levels: We have changed the status levels so that there will be more flexibility. The new status levels are: Agency, OMB, Collaborate, Pending Final, Spring Updates--Agency Fall Lockout, and Final.
- XML Data Transfer: For a few select agencies, they will be able to import/export their PARTs into PARTWeb in a XML data file. (UPDATE: We are still working on this feature. Each agency that wants to do XML transfers needs to be certified with a C & A. Please send an email to <u>PARTWEB@omb.eop.gov</u> if you have any questions)
- Abbreviated Reassessments: Since many programs that were previously rated Results Not Demonstrated have developed and implemented new performance measures, this year abbreviated reassessments will be permitted in specific cases.
- Creating New Assessments: This PARTWeb season, OMB has designed an easier way for agencies to create their PARTs in PARTWeb. We have designed the system to have the codes and titles in a pull-down box. The agency only needs to select which program they want to create out of the assigned list.
- MAX Homepage: The Max Homepage has been has changed to be better integrated with the PARTWeb application. In the new MAX Homepage, the Agency Administrator will be able to remove and add users, assign user permissions immediately after approving a pending user, and provide global access.
- Analytical Reports: The Analytical Reports is designed to give a data dump of three areas of PART: Rating, Improvement Plans, and Performance Measures. It can be used across an agency or when comparing agencies.
- Web Addresses (URLs): Web addresses are encouraged to be used in PARTWeb especially in the explanation/evidence in the Questions Answers section. There is a specific way that the web addresses has to be typed in order for it to appear in the printable, publishable version of the full PART, and Expectmore.gov
- Sequence Numbers: Sequence numbers are used in the performance measure and follow-up action sections of the PART. Sequence numbers allow organization of the total list of performance measure and improvement plans as well as list of targets/actuals.
- Spring Updates: This spring, all 2006UPD PARTs will require a 2007SPR. The 2007SPR will only allow the improvement plans and the target/actuals of performance measures to be edited. The 2007SPR will allow agencies to update their information, and then uploaded it to Expectmore.gov

Character Limits

Listed below are the character limits for key fields in PARTWeb:

- Program Title: 1024 characters
- Evidence: 4000 characters
- Explanation: 4000 characters
- Performance Measure Text: 4000 characters
- Performance Measure Explanation: 4000 characters
- Performance Measure Target: 20 characters
- Performance Measure Actual: 20 characters
- Improvement Plan: 200 characters
- Improvement Plan comment: 500 characters
- Funding Account Explanation: 4000 characters

Listed below are the character limits for key fields in Expectmore.gov:

- Program URL: 100 characters
- Program Summary: 325 characters
- Follow-Up action: 200 characters
- Findings: 400 characters

Purpose of This Document

This document is a resource manual for using PARTWeb. The document contains an overview of the system and its features, specific instructions for using those features, and points of contact for technical assistance in troubleshooting.

Additional copies of this help manual may be obtained on-line at <u>http://www.omb.gov/part</u> and https://max.omb.gov/maxportal/webPage/home/training

Introduction to PARTWeb

As its name implies, PARTWeb is an interactive, web-based database designed to collect and monitor information related to Federal program evaluations conducted under the Program Assessment Rating Tool (PART) process. The PART was developed to assess and improve program performance so that the Federal government can achieve better results. A PART review helps identify a program's strengths and weaknesses to inform funding and management decisions aimed at making the program more effective. The PART therefore looks at all factors that affect and reflect program performance including program purpose and design; performance measurement, evaluations, and strategic planning; program management; and program results. Because the PART includes a consistent series of analytical questions, it allows programs to show improvements over time, and allows comparisons between similar programs.

PARTWeb's Features

PARTWeb is used by both Federal agencies and the Office of Management and Budget (OMB) to complete and collaborate on required elements of PART. Here is a list of the major features and components:

- A secure user and agency-based ID system that ensures secure collaboration within agencies and within OMB, depending on the stage of PART completion.
- The ability for agencies and OMB units to set up user accounts and manage access levels.
- Direct access for entering PART data using a web-based application. By using PARTWeb, agencies can create a new PART assessment, edit an existing assessment, enter funding data, answer and edit PART questions, enter performance measures, and report on progress toward implementing OMB recommendations regarding a PARTed program.
- The ability for all PARTWeb users to view and search all completed PART assessments (there are currently about 821 completed assessments in OMB's database). This encourages information sharing and collaboration between agencies, and offers opportunities to exchange lessons learned and best practices.
- Standard XML format to facilitate data exchange with other agency management and budget systems.

Section 1: Accessing PARTWeb

New Users

PART application administration will be performed by delegating authority to one or more agency administrators or coordinators. Only OMB should be assigning Agency Administrators. To gain access to PARTWeb, new users and Agency Administrators need to go to the MAX homepage at https://max.omb.gov/maxportal/register.jsp and fill out the electronic registration form. After pressing submit, the new user will receive a confirmation email that will contain a URL in it. The URL will take the new user to a PDF of their registration that they will need to print, sign and fax along with a photocopy of the user applicant's Federal photo identification badge to their respective Agency Administrator (Agency User) or to OMB (Agency Administrators) at (202) 395-5080. After the new user has faxed the request form and it has been approved by OMB, they will receive an email containing a link where the user can activate their account and create a password.

Agency PART Administrators will manage the PARTWeb process at the agency level. They will be the people approving the email addresses and giving applicants' access to PARTWeb. To approve new agency user requests, the Agency Administrator needs to login to the MAX Homepage at https://max.omb.gov/maxportal/login.jsp with the same information they login to the PARTWeb application. If they login and have pending requests for access to PARTWeb, a list will appear for them to approve. The Agency Administrator can only approve a new user once they have received a signed request form as well as a photocopy of the user applicant's Federal photo identification badge.

If you are an agency user requiring access to PARTWeb, please contact your Budget or Strategic Planning office for the name of your Agency PART administrator.

Passwords

Passwords are maintained by the user. Users will need to go to the web page located at <u>https://max.omb.gov/maxportal/passwordResetForm.do</u> to reset their passwords. You will need to type in your email address and press the submit button. The email address that is submitted by the user will be validated if it matches the one that is currently in our system. (Note: Please make sure that you contact your Agency Administrator at OMB when you update your valid user information!)

Check your email box for an email that will have a link that will direct you to reset your password. Click on the URL and the following screen will appear.

Please pay attention to the criteria for resetting your password. It has to be 8 characters minimum and have at least: 1 capital letter, 1 lower case letter, a number, and a special character. Please keep in mind that your password has to be reset every 90 days and it is a 30 password cycle.

If you suspend your PARTWeb account, please go to

<u>https://max.omb.gov/maxportal/passwordResetForm.do</u> to fix it. One can suspend their account by typing their login information incorrectly more than 5 times.

PARTWeb User Roles and Responsibilities

Definitions of various types of PARTWeb users follow. Agency and OMB administrators set user access levels depending on their role in the PART process.

• Agency Admin - These users are responsible for agency UserId administration and assigning PARTs within an agency. More than one agency user can be assigned to update a PART. Agency Admins can read/update all PARTs within an agency. These users can also create new programs to be PARTed for their assigned agency after receiving the PART code from their examiner.

• Agency User - These users can read, view or edit PARTs within an agency, depending upon the level of access given by the Agency Admin.

• Agency Review - These users have read-only access to assigned PART programs.

• **OMB User** - These users can read and update all PARTs within their OMB Branch. These users can also create new programs to be PARTed for their assigned agencies.

• OMB Review - These users will have read-only access to assigned PART programs.

PARTWeb URL

Once you have a user account established in PARTWeb and have set up your password, open your browser and go to: <u>https://max.omb.gov/app/part/</u>. Enter your user ID (which will be your email address) and password and you will be in the Program Assessment Rating Tool (PART) system's main page. This is also referred to as the PARTWeb home page.

Section 2: PART Program Management

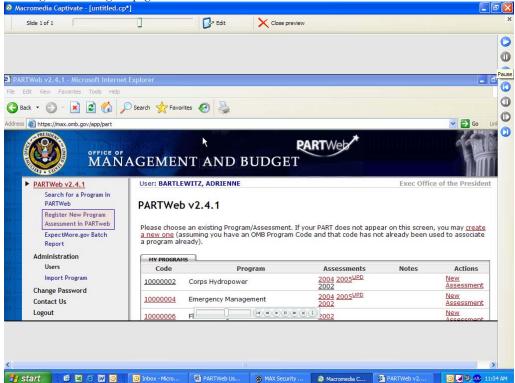

In PARTWeb, PART assessments are conducted under specific agency programs. The program must first exist or be established in PARTWeb before a PART assessment can be created. Only Agency Administrators and OMB can create a new program which will be done in mutual agreement.

OMB has designed an easy way for agencies to create their PARTs in PARTWeb. We have designed the system to have the codes and titles in a pull-down box. The Agency Administrator has to select which program they want to create.

Creating a new program (and assessment):

(**Please note that if this is the first time that a program is being assessed, a new assessment is automatically created when you create the program**)

- 1. Login as an administrator or OMB user who has permission to create a new assessment.
- 2. Click the "Register New Program Assessment in PARTWeb" link on the left-hand toolbar. This will bring you to the *Register New Program* page.

3. Please select the OMB Program Code box to see the pull-down box of all the PART codes and titles. Please select the PART program code and title that has been assigned by OMB for the particular PART. The PART title and code will not appear in the pull down list until the PART has been submitted to the RMO and approved for assessment.

Section 3: Completing Your PART

Creating/Editing Assessments and Reassessments

Creating a new assessment

Once you have created a program, the next step in the PARTWeb process is to create a record that will house data about your PART evaluation. This is called an assessment. Once you create a new assessment, you can access related data fields in PARTWeb such as the screens for inputting answers to questions, performance measures, and recommendations. (**Please note that if this is the first time that a program is being assessed, that a new assessment is automatically created when you create the program**)

Creating a reassessment:

- 1. Login as an administrator who has permission to create/edit a new assessment.
- 2. From the Home Page, click your appropriate Program title to go to the Program Home Page.

Status Levels

The status levels offer examiners and agencies flexibility to complete the PART. The status level concept is basically "who has the pen" (who has read/write access to the PART). Once the PART is almost final, examiners would set it to pending final which gives OMB read/write access and the agency just read access. This should be set just before the appeals process begins.

There is the ability to toggle between status levels. This means that you can go from Agency and OMB Shared Draft to OMB Working Draft and then back to Agency and OMB Shared Draft.

The version changes stay with the status level. This means that all the version changes made in the Agency Working Draft status level will not be seen in the Pending Final status level.

The new status levels are as follows:

- <u>Agency Working Draft</u>: Only the Agency has the ability to view and make changes to the PART. OMB cannot view or make changes to the PART.
- <u>OMB Working Draft</u>: Only OMB has the ability to view and make changes to the PART. The Agency cannot view or make changes to the PART.
- <u>Agency and OMB Shared Draft</u>: Both OMB and the Agency can view and make changes to the PART.
- <u>Pending Final</u>: Only OMB has the ability to view and make changes to the PART. The Agency can view the PART but not make changes.
- <u>Fall Updates--Agency Fall Lockout:</u> Both OMB and the Agency can view the PART. Only funding accounts, follow-up actions, and performance measures can be changed.
- <u>Final</u>: The PART has been published and no changes can be made.

Web Addresses (URLs)

URLs are encouraged to be used in the explanation and evidence of the Question Answers section. According to the 2006 guidance on how to answer questions: *When you cite a web-based resource or website, include the full URL (http://...), verify that the address works, and be as specific as possible about what you are referencing (including the page number, where possible). Web addresses are hyperlinked in ExpectMore.gov, allowing the reader to click on the link and review the evidence. The web addresses will not be hyperlinked in PARTWeb.*

In order for the URLs to properly work in the Printable version, Publishable version of the Full PART, and Expectmore.gov, the URL needs to be typed a certain way. For example, if the URL is <u>www.omb.gov/part</u>, then the URL needs to be typed like:

http://www.omb.gov/part

Creating new question answer weights

Improvement Plans

Improvement Plans are designed to allow the agency to show the goals of the particular program. The criterion that needs to be filled out that is listed below.

In the fall 2007 PART update To better track improvement actions and determine the progress of program improvements, several enhancements have been made to PARTWeb:

1. Date of Expected Completion -- All improvement actions must now include an expected completion date and enter that date into PARTWeb. This is a mandatory field. Enter in the date of expected completion for each improvement action.

2. Date Updated -- The date of the updated status will now be tracked and will automatically be entered by PARTWeb when the improvement action is edited.

3. Ongoing and Completed Improvement Actions -- Additionally, the display for ExpectMore.gov has been separated into ongoing improvement actions and completed actions. This will make it clearer to the public what improvement actions the program have taken to improve and what ongoing improvements the program is taking.

Since, updating improvement plans is one of the most crucial parts of the process and improvements plans should be aggressive and designed to improve program performance, all PARTs must have ongoing improvement actions that contribute to accomplishment of the program's long-term performance and efficiency goals.

Select the year the action was begun

This should be the calendar year when the action was identified and/or first reported. For most actions, the year will correspond with the year that the PART summary listing the action was first published. For example: The 2007 PARTs, several programs began working on their follow-up actions in advance of the publication of the PART summaries. Those programs accurately reflect 2005 as the year begun.

Verify/enter the category for the action

The category is used for internal tracking and is not published.

- Budgetary The President's Budget includes a proposal relating to the total funding for the program or funding for a portion of the program (i.e., to increase, decrease, or maintain the current level) or to change the distribution (targeting) of funding within the program. The budget recommendation is based largely on performance.
- Legislative The follow-up action relates to submitting a legislative proposal or working with the Congress in an informal fashion to enact a legislative change. The legislative proposal may be included in the President's Budget or submitted separately and it may in appropriations language, considered as part of an authorization bill, or submitted as a separate bill.
- Performance Measurement The agency is developing or will develop new performance measures (long term, annual, or efficiency) or the agency is or will develop targets for its performance measures.
- Management (other) The agency is taking or will take administrative steps (besides developing performance measures) in response to PART findings. Examples include putting performance contracts in place to hold managers accountable for performance, revising regulations, modifying grant announcements, establishing a methodology for measuring improper payments, etc.

Update the status:

- *No action taken* The agency/program has not taken steps to implement the follow-up action.
- Action taken, but not completed The agency/program has taken some steps to implement the follow-up action, but has not completed the action.
- *Completed* The agency/program has completed the follow-up action.
- Enacted This category should only be used for actions categorized as budgetary or legislative, such as when the President's Budget included a funding proposal that was

enacted by the Congress or when the Administration submitted legislation that the Congress enacted.

- Not enacted Just as "enacted," this category should only be used for actions categorized as budgetary or legislative.
- Inactive: This is a new update status if the program is no longer working to achieve this improvement action. All inactive actions must be replaced with current improvement actions. This option should only be used with consultation with your OMB program examiner.

Provide comment to explain status

As appropriate, explain the status of the follow-up action. There is limited space so explanations should be succinct.

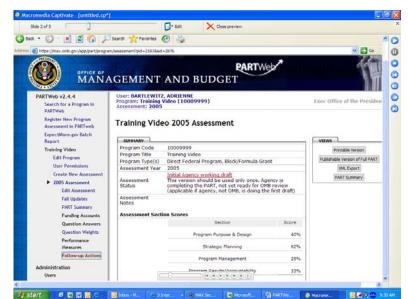

- *No action taken* An explanation is required. There is an exception for new actions that were just added.
- Action taken, but not completed The explanation could explain what has been done and what remains to be done and the associated timeline.
- *Completed* The comment may explain the associated impact on performance.
- *Enacted* The comment may explain when the budget or legislative proposal was enacted, including mentioning the legislation that enacted it.
- Not enacted If a budgetary proposal from a prior year was not enacted, the comment should identify if the action is proposed again in the FY 2007 President's Budget or there should be an additional budgetary action listed for 2006.
- The comments relating to legislative actions should make clear what exactly was done. For instance, legislation was introduced; legislation has been approved in the Senate, etc.

Creating a new Improvement Plan

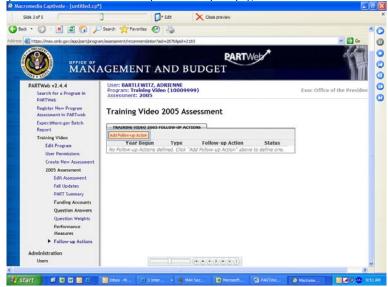

- 1. Login as an administrator or a user with permissions to edit a program.
- 2. From the Home Page, click the appropriate Assessment year for the PART.

Section 4: PART Summaries

PART Summaries are a program summary for <u>www.ExpectMore.gov</u>. When a person clicks on a program, the PART Summary is the first information the person is given about the program.

Updating PART Summaries

Beginning in 2006, all users have access to update the PART summaries. There are several sections in the PART Summary. They are as follows: program description, program URL, 3 topics, 3 findings, and 3 improvement plans.

The program description is a short description that allows a person to understand what this program is. It should tell the reader the purpose of the program.

The program URL can be the Department's URL or it can be specifically the program's URL. For example, if the PART Summary is for Missile Defense, then they could have <u>http://www.mda.mil/</u> (the program's URL) or <u>http://www.defenselink.mil/</u> (Department of Defense URL).

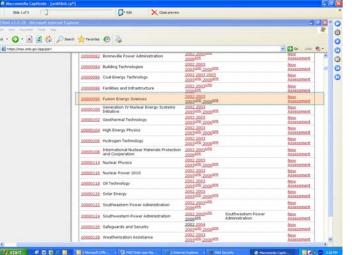

The topics need to be chosen according to the budget function that the program uses. There 17 topics that the user can choose from are Agriculture, Business and Commerce, Community and Regional Development, Disaster Relief, Education, Energy, Foreign Affairs, Government Administration, Health and Well-Being, Housing, Law Enforcement, National Security, Natural Resources and the Environment Science and Space, Training and Employment, Transportation, and Veterans Benefits.

The findings should explain the rating and highlight the strengths and weaknesses of the program. The findings selected for display on Expectmore.gov should clearly support the program rating in tone, theme and content. For example, if the program is rated "Ineffective" the findings should identify the program's deficiencies and weaknesses. A Moderately Effective or Adequate program should have a mix of positive and negative findings presented.

The improvement plans that appear in the PART Summary are separate and not connected to the rest of the assessment. The Improvement Plans are the actions that OMB and the agencies agree are

necessary to address the program's weaknesses as identified in the PART and improve program performance.

- 1. Login as an administrator or a user who has permission to edit a program.
- 2. From the Home Page, click the appropriate Assessment year for the PART.

3. Click on *PART Summary* on the left side toolbar.

Section 5: Abbreviated Reassessments

The option for an abbreviated reassessment has been eliminated. A program reassessment must have updated responses for all questions.

Section 6: Analytical Reports

The Analytical Reports is designed to give the PART community to a broader view of performance data. The PARTWeb reports portal is an additional analytical tool that can be used to further analyze trends across PART assessments within and outside of your agency.

The reports are simple to use and were created to allow PARTWeb customers to parametize each report according to their data needs.

PARTWeb Analytical Reports also enhances your ability to further analyze the data by saving to Microsoft Excel format where you can create graphs and charts or pivot the data to further understand trends.

If you have a suggestion for a report that is not available, please email James Hurban at <u>jhurban@omb.eop.gov</u> so that the report can be developed and shared widely with the performance community.

To use PARTWeb Analytical Reports, you will need to log in using your PARTWeb ID and password (the same one you use to log into PARTWeb).

Once you enter the reports portal, all of the reports are available to all registered users.

To run a report, click on the report and chose your parameters that you wish to see in the report.

Once the report is completed, you may download the report to several formats (by clicking on the download button on the menu bar): pdf, excel or rtf format.

Several reports should be helpful to see what other agencies are measuring for outcome and efficiency or their improvement plans to achieve better effective programs.

Data Reports:

PARTWeb also offers a quick method to get a data query of three areas of PART: Rating, Follow-up Actions, and Performance Measures. It is designed to be an easier process than going into individual PARTs and obtaining the information. The Analytical Reports is designed to be used across an agency or when comparing agencies.

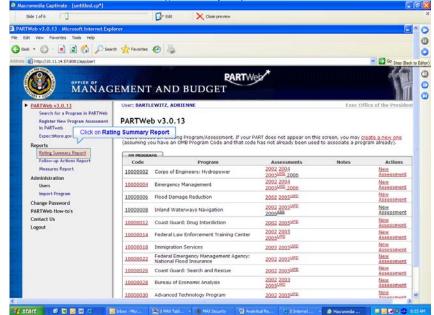

In each of the three types of Analytical Reports, three different criterions can be chosen: assessments years, program types, and agencies.

The Analytical Reports can be used by Agency Administrators, Agency Users, and OMB Users.

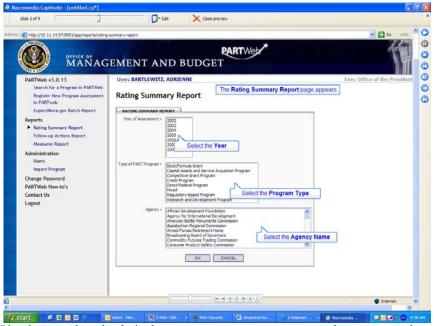

Rating Summary Report

This option will give the PART Code, PART Title, Year of Assessment, Rating, and the four section scores for the Assessment. The overall total score is not shown.

- 1. Login to the PARTWeb application as an Agency Administrator, Agency User, and OMB User.
- 2. On the left-hand toolbar, click on Rating Summary Report.

3. The Rating Summary Report page will appear. Select the desired Assessment Year, Program Type, and Agency Name. Multiple years, program types and agencies can be chosen.

4. Click the Okay button when the desired assessment year, program type and agency name have been chosen.

Section 7: Spring Updates

Each spring, agencies have the opportunity to update portions of the information presented on <u>www.ExpectMore.gov</u>. This updated information will be posted on <u>www.ExpectMore.gov</u> in early summer.

Only the latest Fall Update (UPD) assessment for a program will have a Spring Update (SPR). New assessments that year are exempt from the Spring Updates. However, programs that are being reassessed will need to complete the Spring Updates.

About the "SPR" Version

When the Spring Update (SPR) version is created, PARTWeb <u>copies all of the information from the most</u> <u>recent Fall Update (UPD)</u>. The SPR assessment will allow users to update new performance data (only new targets/actuals) and the improvement plan. The SPR assessment will be done in the Agency and OMB working Draft status level.

<u>Actions</u>

Agencies should update the following for programs as appropriate:

- Enter any available updated information on their improvement plans in PARTWeb.
- Enter any available additional performance data into PARTWeb. (Only existing measures may be updated at this time. New performance measures may not be at this time.)

OMB Program Examiners should do the following:

• Review the information entered into PARTWeb, ensure it is accurate and complete, and work with agencies to make any necessary changes.

Entering Information into PARTWeb

Please note that the answers, explanations, and evidence are locked and cannot be changed. The Spring Update screen will be prepopulated with the most recent information (i.e., that which is currently posted on <u>www.ExpectMore.gov</u>) and will allow the user to update information on PART improvement plan and to add new performance data. The new information will be retained as a spring version of the PART and when final, posted in the PART details on <u>www.ExpectMore.gov</u>, replacing the existing information.

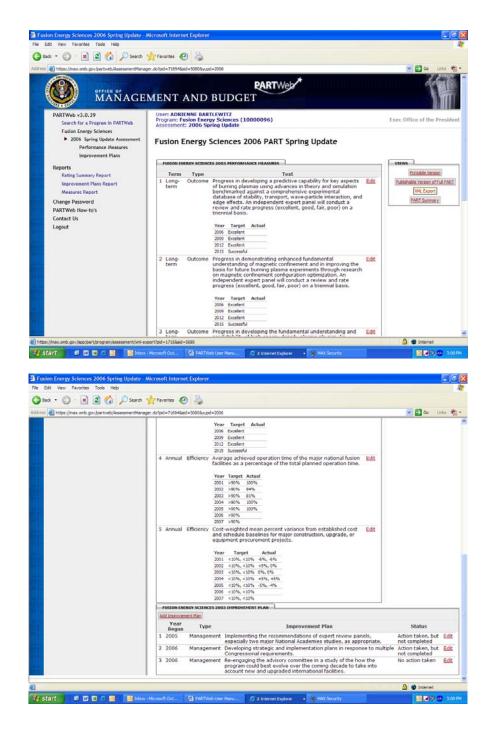

Updating Improvement Plans

Each program that has been PARTed has a set of follow-up actions (also known as an improvement plan) it is taking in response to the PART findings to improve program performance. Information on improvement plans will be updated twice a year - in the spring for release in early summer and in the fall for release with the President's Budget. (Note: The follow-up actions listed on the Summary the ExpectMore.gov summary will not be updated at this time.)

Agencies should ensure that the information they report on their improvement plans (e.g., the year the action was begun, the status of the action, etc.) is correct and current. This reporting should reflect activities completed to date.

Screenshots

Here are some screen shots of the Fall Updates screen:

Section 8: Fall Updates

Each fall, agencies have the opportunity to update portions of the information presented on <u>www.ExpectMore.gov</u>. This updated information will be posted on <u>www.ExpectMore.gov</u> in early February when the federal budget is published.

You will complete all of these actions in PARTWeb using the "200X FALL" files. The 200X fall updates screens are similar to the 2005 fall updates and 2006 spring updates screens you have used in the past; they allow you to edit only certain portions of PART data.

To access the 2006 fall updates screens, hit "2006 FALL" in your "My Programs" list in PARTWeb.

Making Fall Updates to Performance Data, Funding Information and Improvement Plans

We have created this consolidated screen for you to enter your updates to the performance measures, funding accounts and improvement plans. It is called the *Fall Updates* screen. To access this screen, you will need to open the relevant PART and click on Fall Updates link that can be found in the left side toolbar in PARTWeb.

About the updated version

To access the Fall Update, please click on most recent FALL found on the PARTWeb main page.

Once you open the PART and click on *Fall Updates*, the Fall Updates screen will appear. You will have to do these steps each time you want to access the Fall Updates as there is no direct path from the main page to the Fall Updates screen.

At this point, the answers, explanations, and evidence are locked and cannot be changed for all PARTs.

Once you select the latest assessment year for your program and hit the *Fall Updates*, PARTWeb automatically creates an updated assessment named *200x FALL*. When the FALL version is created, PARTWeb <u>copies all of the information from the PART you selected</u> and updates it with the new measures, funding, and follow-up actions information you provided. In effect, this creates a back-up of the full PART as it was before you started making your fall updates. The information in the FALL version is what will ultimately populate the fields of the publishable PART assessment reports that will be posted on the OMB website regardless of whether the PART was originally completed that year or not.

Even if you accidentally chose a different assessment year, the system will automatically give you the UPD version with the fall update information if one has already been created.

Section 9: USER ADMINISTRATION

This section reviews Agency Administrator tasks related to setting up new user accounts, assigning appropriate permissions (i.e. the authority to create and/or edit various components of PARTWeb including Programs, Assessments, and Teams).

<u>Users</u>

Only Administrators can approve new agency user accounts. Agency and OMB employees who require administrator authority must complete the Registration form on the MAX Homepage and fax it along with photocopy of their Federal photo ID to the OMB at 202-395-5080.

In order for an Agency Administrators to approve a new user, they <u>need to have</u> a signed registration form and a copy of the new user's government identification badge.

Approve Pending Users Who Do Not Have an ID

1. Login to the MAX Homepage as an Agency Administrator at <u>https://max.omb.gov/maxportal/sa/login.do</u> Once logged in as an Agency Administrator, a list of applications you are registered for will appear. Under "You are registered for the following applications", you should have PART. If you do not have PART, you are not in the PARTWeb system as an Agency Administrator or a user.

- 2. Please click on Manage Agency Users. (Do not click on PART as it will take you to the PARTWeb login page).
- 3. A list of applications will appear that the Agency Administrator has administrator access to. Please click on PART.

- 5. To approve a pending user, please select the *Approve* button. The Agency Administrator can only approve a new user once they have received a signed request form as well as a photocopy of the user applicant's Federal photo identification badge. Please note that by approving you are certifying that you have read the "*Certifier Agreement for an Agency Administrator*."
- 6. Once *Approve* is clicked, the pending user will no longer appear in the box.

Approve Pending Users who do not have a PARTWeb ID but have an ID to other applications provided by OMB

- 1. Login to the MAX Homepage as an Agency Administrator at https://max.omb.gov/maxportal/sa/login.do
- 2. Once logged in as an Agency Administrator, a list of applications you are registered for will appear. Under "You are registered for the following applications", you should have PART. If you do not have PART, you are not in the PARTWeb system as an Agency Administrator or a user.

Permissions

PARTWeb's Permissions function enables Administrators to authorize specific user access to various PARTWeb components.

User Permission is given at the PART program level. The Administrator only has to give access to the PART program and then the user will have access to every year that the PART was assessed.

Permissions on the MAX Homepage

User permissions can still be assigned in the PARTWeb application; however, there is the option to provide user permissions to both already existing users and new users immediately after they have been approved for PARTWeb. Please remember that user access is given at the Program level. This means that if a user is given access to the PART program, they will be able to have access to all of the assessments associated with that program.

Global access is another new feature on the MAX Homepage. This option can be used when the Agency Administrator wants to give read-only, write-only, admin-only (or any combination of the three) access to all of the PART programs for the agency.

User Permission

- 1. Login to the MAX Homepage as an Agency Administrator at <u>https://max.omb.gov/maxportal/sa/login.do</u>
- 2. Once logged in as an Agency Administrator, a list of applications you are registered for will appear. Under "You are registered for the following applications", you should have PART. If you do not have PART, you are not in the PARTWeb system as an Agency Administrator or a user.

Permissions in PARTWeb

Check Agency admin permissions on Home Page

- 1. Login as an Agency admin user.
- 2. From the Home Page navigation menu, check the following permissions.

- 1. The user has permission to the "Administration" links.
- 2. The user has permission to the "Register New Program" link.
- 3. The user has permission to the "New Assessment" link.

Check OMB user permissions on Home Page

- 1. Login as an OMB user.
- 2 From the Home Page navigation menu, check the following permissions.

Section 10: XML Data Transfers

Currently Under Construction

Section 11: Help

To troubleshoot technical, network, and systems problems with PARTWeb, agency administrators should call the EOP Help Desk at (202) 395-7370 (this is also the MAX A-11 application support) or please email <u>PARTWEB@omb.eop.gov</u>.

There is a Contact Us page in PARTWeb that provides guidance and contact information. Also, there are several tutorial videos on the MAX Homepage (<u>https://max.omb.gov/maxportal/webPage/home/partWebTraining</u>) that may be helpful.

For questions related to a specific PART program, the agencies should work with their respective OMB program examiner. You can find the OMB program examiner's contact information in each PART that the OMB examiner is assigned to.
